Yours faithfully

Joanna Kiernan  
Company Secretary

Kingsrose Mining Limited (ASX:KRM) owns 85% of the Way Linggo Gold Project in Southern Sumatra, Indonesia. The Project is held under a 100km<sup>2</sup> 4<sup>th</sup> Generation Contract of Work (CoW) and is located on the mineral rich Trans-Sumatran Fault, part of the Pacific Rim of Fire. The Project has established infrastructure with a 140Ktpa processing plant and has a track record of high grade, low cost production from the original Way Linggo Mine.

The Company is currently producing from its second mine on the Project area – Talang Santo, which, based on current development is pointing to being a significantly larger mineralised system than that seen at the Way Linggo Mine. In addition, significant exploration upside exists on the wider Project area with numerous high priority targets identified. A systematic and disciplined exploration program was implemented over the last 12 months which has yielded early stage success with gold veins identified undercover and encouraging results from a recent orientation drilling program testing blind mineralisation.
